

Lock-screen Guidelines

Lock-screen template

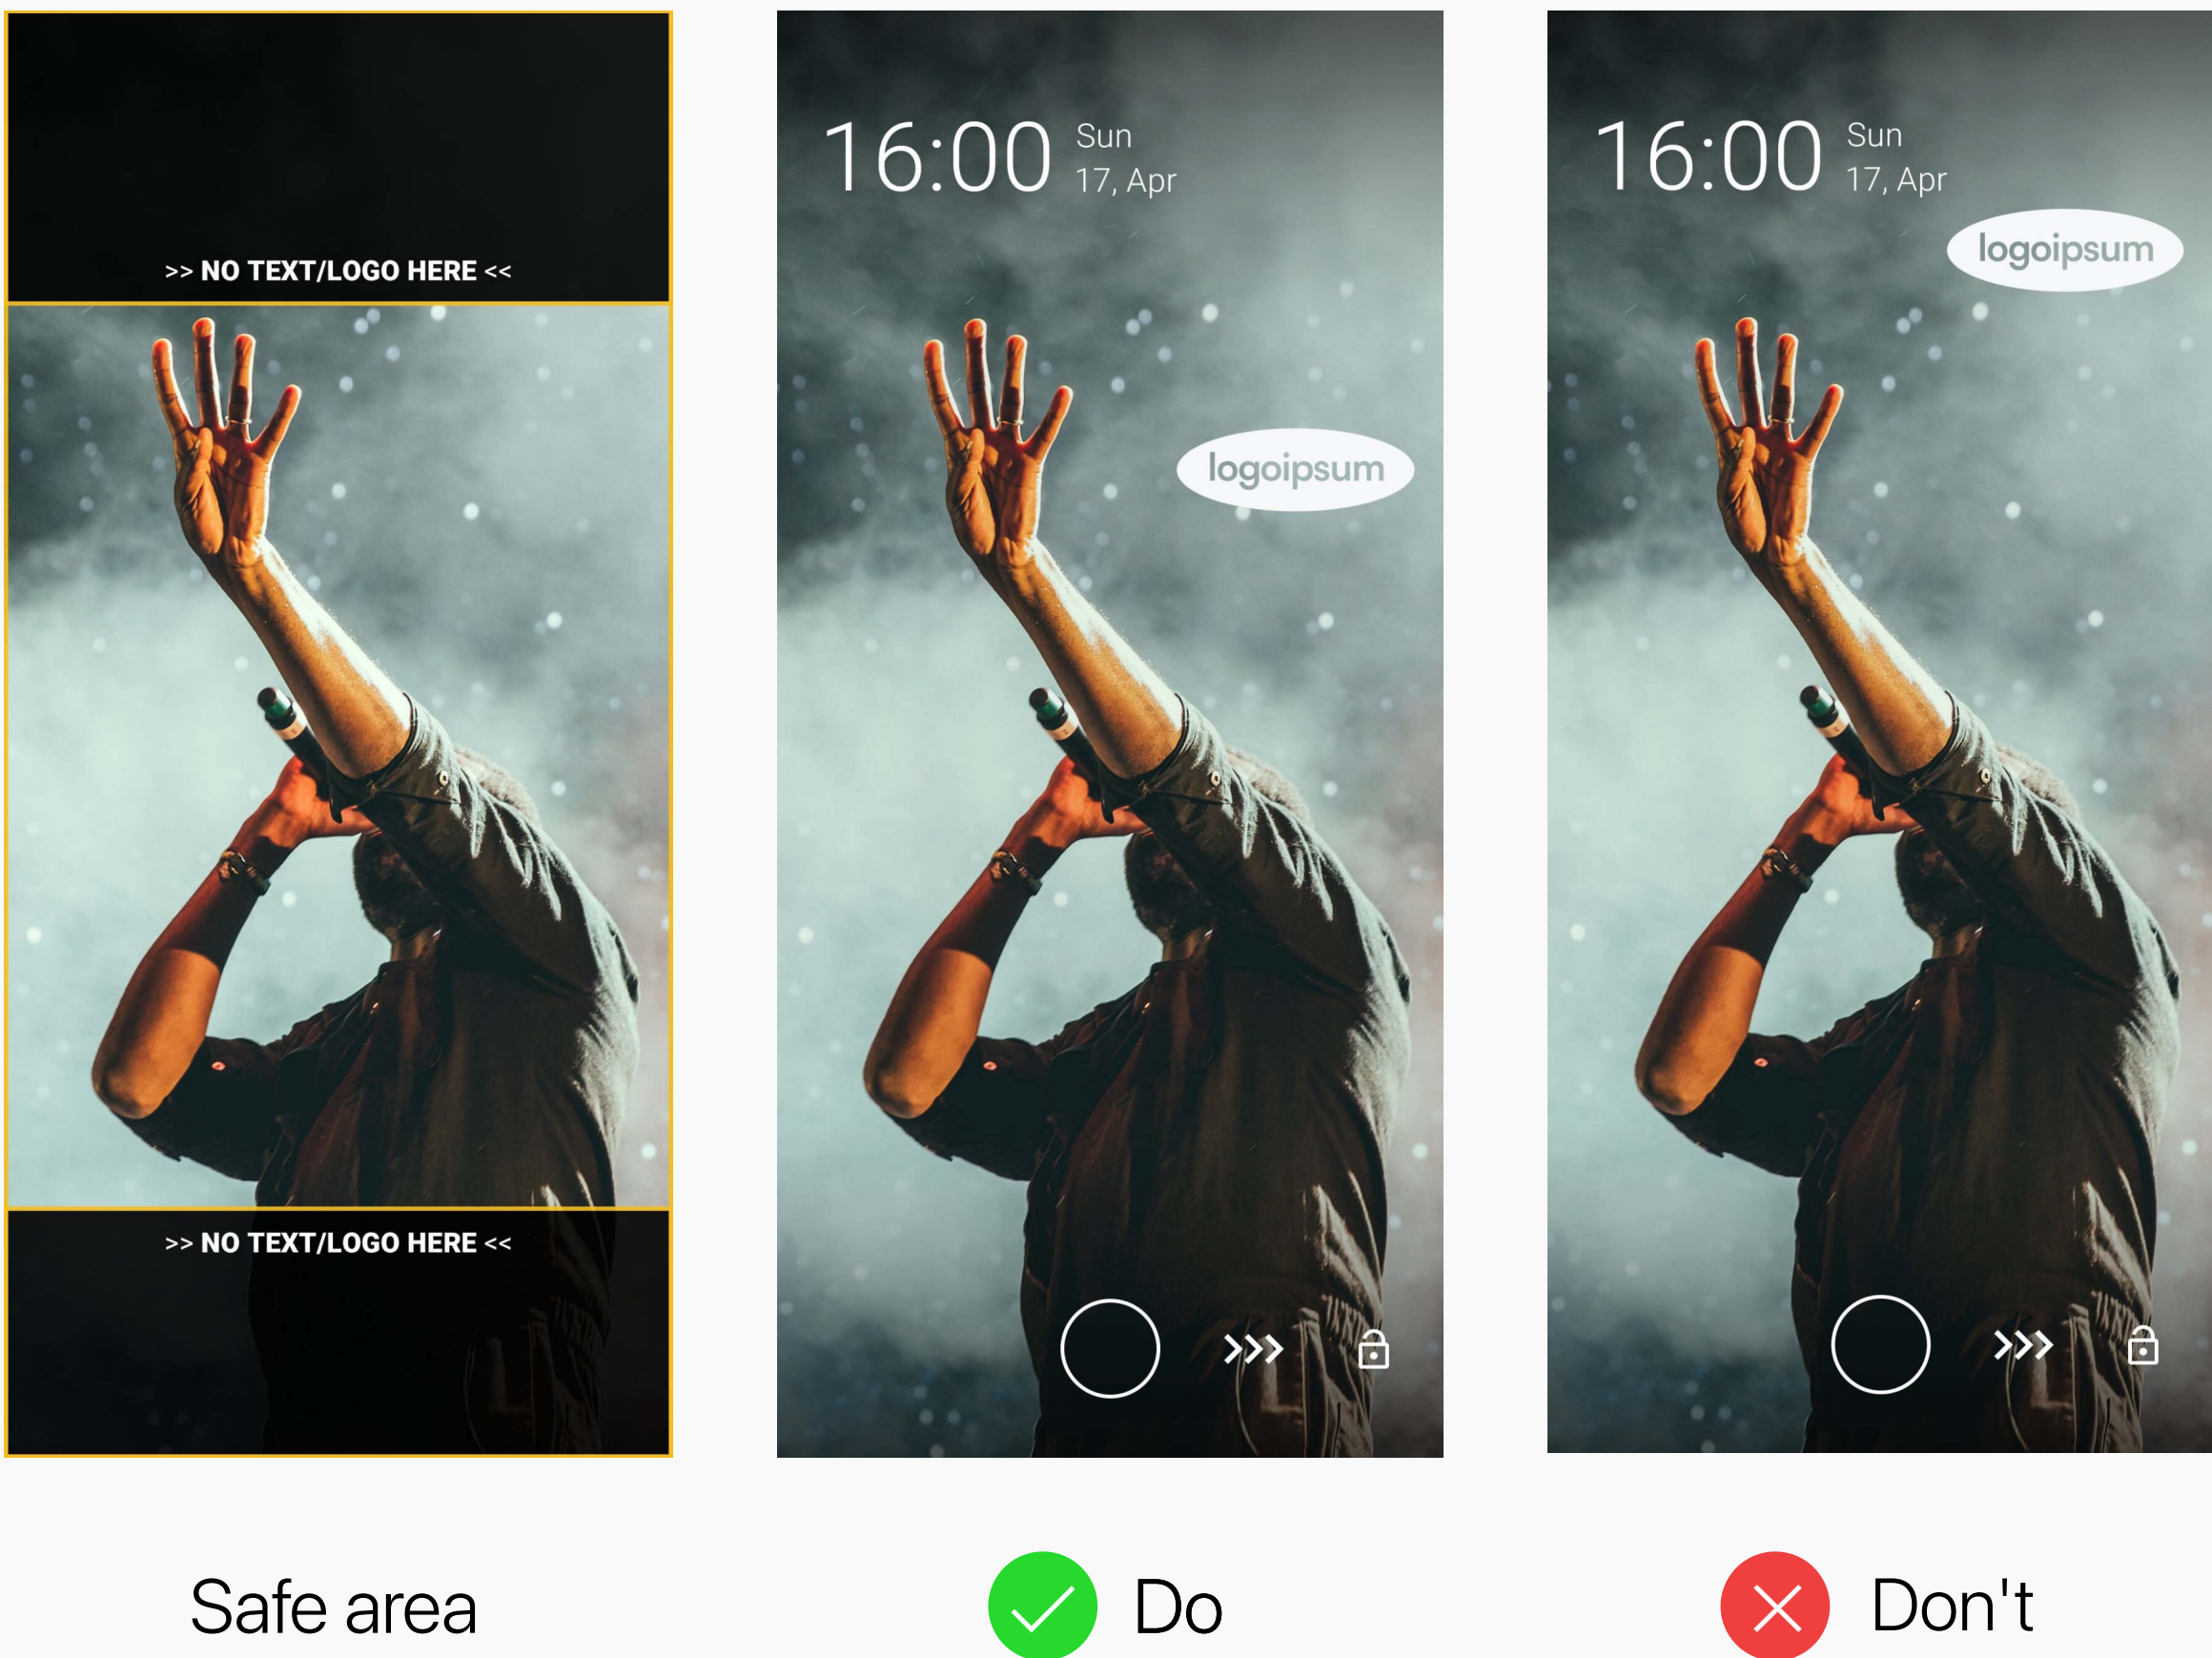

Dimensions: 1080x2340

The lock-screen template consists of some example ads and three assisting layers. These layers (safe-area, icons, and gradient) will give you a better look at the actual lock-screen view. The layers can be turned on/off at any moment.

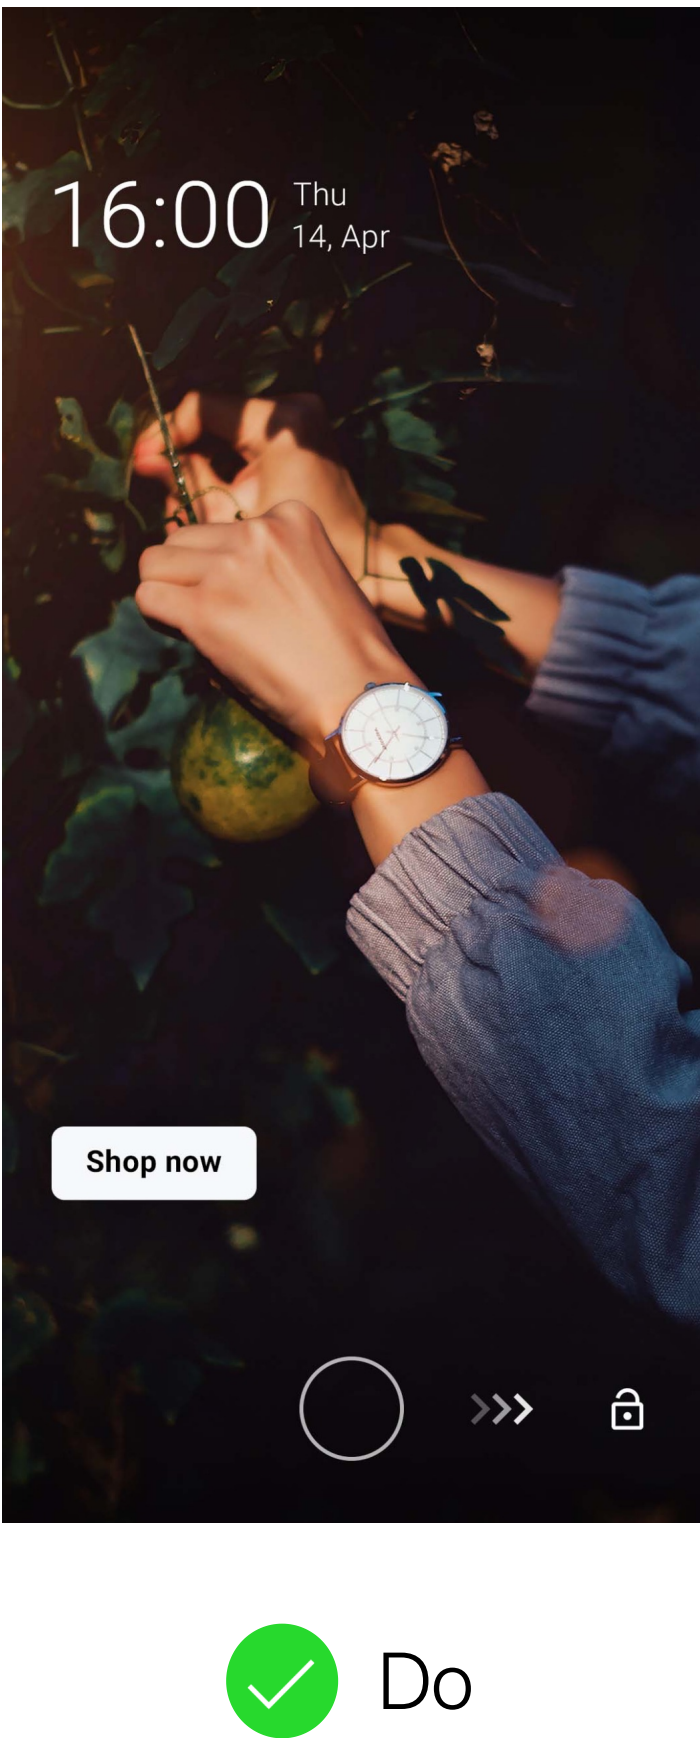

Safe area

Remember that some devices have a smaller aspect ratio, which means some lock-screen ads will get cropped. Ensure that the text, logos, and important visual aspects of the image are within the safe area.

Buttons

The lock-screen ads are interactable by clicking anywhere on the screen. The design of a button can be placed anywhere as long as it is within the safe-area.

Text usage

Don't use intrusive discounts in your promotion and try to use minimum text. Keep it seamless and subtle for a better user experience.
